GAME TIPS

To clear out a crowd of racers, tap any direction on the Control Stick and press the Z Button. Your machine will perform a spin attack that repels anything it comes in contact with. Just be careful not to lose control!

While racing competitively, you'll gain access to your machine's turbo booster after the first lap. Use the booster by pressing the Y Button, but watch your Energy Meter. Every boost eats up energy, and you can only replenish it by driving into the Pit Areas.
